PROFESSIONAL SUMMARY

Motivated Junior Full-Stack Developer with a National Diploma in Software Development and hands-on experience building modern web applications using JavaScript, React, Node.js, Express.js, REST APIs, and SQL databases. Currently advancing full-stack engineering expertise through the Codecademy Full-Stack Engineer Career Path, with a strong focus on React development, backend services, API integration, and scalable web application architecture.

Passionate about creating responsive user interfaces, developing efficient backend solutions, and collaborating within agile development environments. Strong foundation in software development principles, debugging, version control, and database management. Eager to contribute to innovative development teams while continuously expanding technical knowledge and practical experience.

EDUCATION

National Diploma in Software Development (NQF Level 6)

Tshwane University of Technology (TUT)

Completed all academic modules

Relevant Coursework:

- Software Development
- Technical Programming
- Information Systems
- Systems Software
- Database Development

Systems Development Learnership (NQF Level 5)

MICT SETA – Altron Bytes

Sep 2021 – Aug 2022

- Completed a 12-month programme combining theoretical and practical workplace training
- Gained exposure to software development methodologies, troubleshooting, and technical support
- Developed problem-solving and collaborative teamwork skills in a professional environment

TECHNICAL SKILLS

Programming Languages

- JavaScript (ES6+)
- TypeScript (Foundational)
- Java
- C#
- PHP
- SQL
- HTML5
- CSS3

Frontend Development

- React
- React Hooks
- Redux
- Next.js (Foundational)
- Angular (Foundational)
- Responsive Web Design
- Bootstrap
- API Consumption
- State Management

Backend Development

- Node.js
- Express.js
- RESTful API Development
- API Integration
- Authentication Fundamentals
- Server-Side Application Development

Databases

- MySQL
- PostgreSQL
- Microsoft SQL Server
- Oracle Database
- MongoDB (Foundational)
- PHPMyAdmin

Development Tools

- Git
- GitHub
- Visual Studio Code
- Visual Studio
- Docker (Basic Knowledge)
- Linux (Basic Knowledge)
- Postman
- XAMPP

Software Engineering Practices

- Debugging & Troubleshooting
- Agile Development
- Version Control
- Software Documentation
- Testing Fundamentals
- Code Reviews
- Problem Solving

PROJECTS

DrumBeats Music Playlist Application

Tech Stack: React, Redux, JavaScript, HTML5, CSS3, Spotify API, REST APIs

- Developed a React-based music playlist application integrated with the Spotify API
- Built reusable and modular React components to improve maintainability and scalability
- Implemented state management using Redux for efficient handling of application data
- Consumed REST APIs to retrieve and display music data in real time
- Applied responsive design principles to deliver a seamless user experience across devices

- Strengthened practical skills in React, API integration, asynchronous JavaScript, and frontend architecture

Film Finder Web Application

Tech Stack: JavaScript, HTML5, CSS3, Fetch API, REST APIs

- Developed a movie recommendation application using asynchronous JavaScript and third-party APIs
- Implemented dynamic filtering and personalized movie recommendations
- Retrieved and processed JSON data from external REST APIs
- Built responsive user interfaces and improved user experience through modern frontend techniques

Service At Your Fingertips (SAYFT)

Tech Stack: PHP, JavaScript, MySQL, HTML5, CSS3, XAMPP

- Developed an online platform connecting event organizers and service providers
- Implemented user registration, service listings, and booking functionality
- Designed and integrated database operations using MySQL
- Collaborated on testing, debugging, and feature implementation
- Applied software development best practices throughout the project lifecycle

CERTIFICATIONS

- Full-Stack Engineer Career Path – Codecademy (Currently Enrolled)
- Full Stack Development – FNB App Academy
- JavaScript Essentials – Codecademy
- C# Programming – FreeCodeCamp
- Oracle Java Foundations – Oracle University
- NoSQL & MongoDB Basics – MongoDB University
- AI Essentials – ALX Africa
- ITIL 4 Foundation – PeopleCert
- Full Stack Java Development for Beginners – Simplilearn

ADDITIONAL INFORMATION

- Available immediately for internship and junior developer opportunities
- Strong interest in React, Node.js, full-stack development, and cloud technologies
- Portfolio projects available on GitHub
- Committed to continuous learning and professional growth
- Passionate about building scalable and user-focused software solutions
